

BRYAN ROSS G. VOCALES

Imus, Cavite, Philippines | 0927 171 1055 | bryanrossvocal@gmail.com | github.com/Entryptix | entryptix.github.io/Vocales_Portfolio/vocales.html

PROFESSIONAL SUMMARY

Computer Science graduate specializing in Data Science with hands-on experience in software development, programming, database management, API integration, troubleshooting, and AI-powered applications. Experienced in developing academic and personal projects using Python, Java, SQL, HTML, CSS, JavaScript, Firebase, Git, and API-based technologies. Built systems involving web applications, database operations, encryption, data processing, and AI-powered image recognition. Strong problem-solving, analytical, teamwork, and adaptability skills with a strong interest in application development and learning new technologies.

TECHNICAL SKILLS

Programming: Python, Java, SQL, R, C++, C#, PHP

Web Development: HTML, CSS, JavaScript, Flask

Databases: MySQL, phpMyAdmin, Firebase, SQL

Software Development: API Integration, CRUD Operations, Database Design, Software Testing, Troubleshooting

AI & Data: Gemini Flash, Pandas, NumPy, TensorFlow, RapidMiner, Data Analysis

Tools: Git, GitHub, Postman, VS Code, Linux, Vercel

EDUCATION

University of Perpetual Help System DALTA – Molino Campus | 2022–2026

Bachelor of Science in Computer Science, Specialization in Data Science | Cavite, Philippines

Southern Philippines Institute of Science & Technology Senior Highschool | 2020-2022

STEM Strand

General Licerio Topacio National Highschool Junior Highschool | 2017-2020

ST. Jerome Emiliani Institute Elementary | 2012-2017

PROFESSIONAL EXPERIENCE

On-the-Job Training — PrimeWater / Silang Water District

Data Management and IT Support | Philippines

- Performed data encoding, verification, and organization of payment and financial records.
- Maintained company vehicle and asset registration records, maintenance schedules, and usage logs.
- Prepared and organized summary reports using structured data and documentation.
- Applied knowledge of server-side systems, data storage and access, and cybersecurity concepts.
- Worked in a professional team environment while developing accuracy, documentation, and problem-solving skills.

SELECTED PROJECTS

LeafLens: AI-Powered Image Recognition for Native Plants

Technologies: Gemini Flash, Firebase, API Integration, AI Image Recognition

- Developed an AI-powered mobile application concept for identifying native and endemic plants from leaf images.
- Integrated AI image recognition and Firebase-based application functionality.
- Participated in system design, testing, documentation, data gathering, and ISO/IEC 25010 software quality evaluation.

Student Management System

Technologies: PHP, MySQL, HTML, CSS

- Developed a database-driven application for managing student information.
- Implemented CRUD operations and database structures using MySQL/phpMyAdmin.

Hill Cipher Encryption/Decryption System

Technologies: Python, HTML

- Developed an encryption and decryption application using the Hill cipher.
- Integrated backend algorithms with a live server for real-time demonstrations.

Epic Games Store Scraper

Technologies: Python, BeautifulSoup, Selenium, Flask, API

- Developed an application for retrieving and presenting game information through web scraping and API technologies.
- Built a Flask interface and structured extracted information for display.

ADDITIONAL TECHNICAL EXPERIENCE

- Performed data cleaning, feature engineering, model selection, and machine learning analysis using RapidMiner.
- Applied supervised and unsupervised learning concepts including classification, regression, and clustering.
- Worked with relational databases, SQL queries, data retrieval, and database management.
- Developed web applications and interfaces using HTML, CSS, JavaScript, and Flask.
- Used Git for source-code management and collaboration and Postman for API-related development and testing.

CORE SKILLS

Problem Solving • Critical Thinking • Analytical Thinking • Team Collaboration • Communication • Adaptability • Time Management • Attention to Detail • Continuous Learning • Technical Troubleshooting

SEMINARS & WEBINARS

Deep Fake News Detection • Grey Wolf Optimization Technique in Machine Learning • Innovation in IoT for Smart Applications • Modern Technology of Parallel and Distributed Programming • Green IOT of Poland • Innovation Practices in Wearable Computing
